Local Legion Has Splendid Remembrance

Splendid Addresses And a Good Musical Program

It was the opinion of all present that the smoker given in the Legion hall here on Armistice night was one of the most interesting and entertaining we have had for some time. Excellent addresses were given by Rev. H. S. Hammett and W. King. Mr. Hammett spoke very forcibly and fearlessly on the things we should remember and the things we should forget. Mr. King gave a vivid description of the ceremony in connection with the unveiling of the Canadian Memorial at Vimy and also interesting and amusing incidents on his trip to France. On behalf of the Legion E. L. Stone expressed the sympathy of its members to the bereaved ones and expressed the hope that eventually the great sacrifices made would prove to have not been in vain.

The evening's program was liberally interspersed with choicest songs, recitations readings and musical selections from the orchestra, the latter composed of Messrs. J. Leonard, Glen Scott and S. Volter of Medicine Hat.

"Those who remember the ghastly and beastly atrocities of the war and frequently see the blind and maimed returned men and their children who never had a chance," said Mr. Hammett, "should remember the things for which they fought, and do their utmost to prevent another such war. Mr. Hammett also made an appeal for help and comradeship for the unfortunate who were still carrying scars of the war. He predicted that the Dictatorships of Europe are paving the way for another war and claimed that community, national and international friendship was the best course to pursue to prevent it. Mr. Hammett complimented Rev. E. L. Stone for his address during the morning services and expressed his great pleasure at the spirit of co-operation which existed between the two congregations.

Mr. King's review of his trip to Vimy was so interesting our reporter forgot to take notes. We would suggest that some other organization have him give it again that more may hear him.

After seeing the thousands of war graves in the seven countries through which he passed and the evidence still of the tremendous destruction, one wonders how another war could start, said Mr. King.

Piper Hosie sounded the Last Post and the meeting closed with the National Anthem.

Mr. Bert Allison acted as chairman and conducted the gathering in a most capable manner.

CARD OF THANKS

On behalf of the local Canadian Legion I wish to extend hearty thanks to Rev. H. S. Hammett, W. King and E. L. Stone for the splendid addresses given the smoker on Armistice

Fire Does Damage To First St. House

Building and Contents Well Covered By Insurance

Fire of a mysterious origin started in the frame house on First Street, owned by T. Van Wert and occupied by D. Forget last Saturday afternoon. Fortunately the fire brigade arrived before the flames broke out and they were not long in putting the smoldering clothing at the rear of the building under control. It was a miracle the building was not burned to the ground. Considerable damage was done to the kitchen by fire and the contents of the house by water and smoke.

Mr. Forget lost most of his clothing and a number of valuable papers which were in his bank.

Both the building and the contents were covered by insurance. Mr. Forget had been insured to his house for a few years with a sprained ankle and just left the house a short time before the smoke was discovered by passersby.

The cold weather this week reminds one of spring.

Court cases are now entered to test the validity of the Redemption and Settlement of Debts Act and the handling of property by Edmonton City Council.

A statement by St. Samuel's church Wednesday was "Great Britain was not committed to send troops across the channel in the event of war."

Eight and also to all who to art in the excellent musical program and those who attended on that occasion.

F. Jones, President

Service Held At St. Ambrose on Armistice Day

Was Held Under the Auspices of Local Legion

St. Ambrose Church was taxed to capacity to accommodate the large number of citizens and returned men for the Armistice Day Service held last Wednesday morning under the auspices of the local Canadian Legion.

Rev. H. S. Hammett conducted the service and offered up very suitable and impressive prayers for the occasion. Rev. H. V. Wilson of Gordon Memorial, delivered a very appropriate and inspiring address which moved the congregation in his many references to the cost of the war and the tremendous sacrifices made in order to bring about peace.

The combined choir sang an enthusiastically lead the singing and rendered very feelingly the anthem: "Oh Valiant Hearts" Messrs. J. Hitchen, A. Maskell and B. Thacker very nicely rendered Kipling's Recessional "Last We Forget".

Mr. Ellison took his text from the 77th chapter of the Psalms: "I Call to Remembrance." In looking over the past the first thing that comes to memory on this occasion is the boys who were left over there, he said. "The memory of their sacrifice is shown in villages, towns and cities throughout the Empire by the monuments erected and the sacred graves of the unknown soldiers who gave up their lives for the sake of humanity. By these monuments and graves 'Their names live' forever." The speaker reviewed the enormous cost of

Meeting Decides To Start Skating Rink

Local Hockey Club Will Take Over Management

At a meeting last Sunday, the Redcliff Hockey Club decided to take over the management of the Town Skating Rink. The following officers were elected: President—Eric Congram, Vice Pres. W. Swanson, Sec. Treas.—E. Congram. The Executive will consist of the following members and the officers: L. Leppard, F. Goodwin, J. Podesta, H. Turner, E. Podesta, W. McChery, G. Dave, R. Allenbach, J. Nohu, T. Maswell, W. Patterson, K. Ellis, R. Schmidt, J. Bergeron.

It was decided to get the rink going as soon as possible. Canada's wheat exports in October reached the highest value since November 1923, when 75,415,597 bushels valued at \$79,252,221 were cleared.

It is rumored that King Edward is contemplating making a visit to his Alberta ranch in the near future. Probably his coming is because he has heard that he can't draw his S. C. D. lands if he is absent from the Province more than two months in the year.

The Christmas Sale of Work of St. Ambrose S. W. A. will be on Wednesday Dec 9th the war, exceeding over 400 British soldiers, which, if humanely applied, he said, would have made more comfortable homes for every family in the allied countries. This was a reminder of the destruction and was also a challenge to all to dedicate their lives and energies to the bringing about of peace in the home, the nation and the world.

Local School Closed For All This Week

Teachers And Pupils Are Down With The Measles

Owing to the spreading of measles among school pupils and teachers the Board decided to close the school for this week and unless conditions improve by the end of the week it may be necessary to close longer.

It is estimated that at least 10 per cent of the pupils now have the measles and two of the teachers, Miss Cox and Mr. Pow, are also down with it. It is thought that the disease has spread so rapidly is simply because parents have not taken the necessary precautions. We would remind our readers that the law requires all parents to notify the health officer at once when there is any such contagious disease in the home. There is a stiff fine for neglecting to do so.

Local Boy Scouts To Collect Old Toys

Will Mend Them For Sending Out at Christmas

Local Boy Scouts have made arrangements for collecting old toys and mending them for use to distribute among needy homes where there are children at Christmas.

The boys will make a canvass of the town on Saturday Nov. 14th. We would suggest that parents and grown children should have no use for old toys should collect them and have them ready when the scouts call on the morning of the 28th.

This is a very commendable move on the part of the Scouts and they should be given every encouragement and assistance.

New Councillor Sworn In Last Monday Evening

Govt. To Consider Having A Credit House Here

At the regular meeting of the Town Council last Monday evening Mr. N. Willis the newly elected councillor, was sworn in and took his seat on the board. A full council was present.

Messrs. E. Congram and J. Podesta as representatives of the skating rink waited on council regarding opening the rink. Mr. Congram explained that considerable improvements were necessary and asked the assistance of council to get the property in condition. Mr. Podesta explained the rink had no funds to make the necessary improvements. He stated they were making arrangements to have proper lighting system installed.

Council offered to give the committee all possible assistance and suggested that regulations be made to provide accommodation for the use of the rink for the younger element during afternoons and Saturdays.

Mayor Sangster welcomed Mr. N. Willis on the board and suggested that if there were any matters coming before council with which he was not familiar, not to hesitate to ask for information. On motion of councillor Rinchell the rent for the house previously owned by the late Mr. Gorman was placed at \$10 month.

Accounts as passed by the finance committee were approved for payment.

A letter was read from the Dept. of Trade and Industry in answer to motion passed by council re the establishment of a Credit House in Redcliff, stating that consideration would be given the matter.

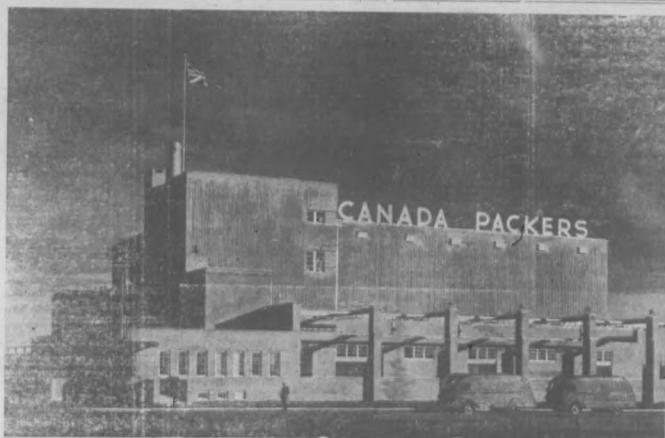

A letter was read from the Dominion Glass Co. complaining about the water supply to the factory in case of fire. The letter suggested some improvements in case of emergency. On motion of councillor Newnam the request was granted.

A letter was read from the Dept. of Municipal Affairs asking that precautions be taken regarding robberies which have been frequent throughout the province recently.

Mayor Sangster instructed the secretary to send out notice suggesting that all citizens, store and industries observe Armistice Day Nov 11th as a public holiday.

The grain yield in Alberta this year was estimated at 170, 522,000 bushels compared with 203,925,000 bushels in 1935. In the report on an agricultural and economic survey of the issue by the department of agriculture. Higher prices for agricultural products will more than compensate for a decrease in production in the province this year.

NEW PACKING PLANT FOR EDMONTON

The new million dollar packing house, erected last summer at Edmonton, by Canada Packers Limited, was officially opened Nov. 4th by Mayor Clark, in the presence of 500 in attendance. The plant is an outstanding example of what can be done in an industrial building to combine pleasing appearance with utility and efficiency.

It is equipped with the most modern machinery and will have a killing capacity of 4,500 hogs weekly, besides cattle, sheep and lambs. Mr. McLean, president of the Canadian Packers Limited, stated as his conviction that Alberta which already stands second in

hog production among the provinces of the Dominion, will within a short time stand first. "When this expectation is realized," he said, "all the packing house facilities in Edmonton, including Canada Packers, will be less than sufficient to handle the hogs. The erection of this im-

portant plant at this time is concrete evidence of the faith of Canada Packers Limited in the future of Alberta, and of the west generally. It also gives to the live stock ranchers of Western Canada further access to the market of Eastern Canada and Europe, which are served exclusively by this company.

Selecting Municipal Representation

With the near approach of the annual municipal elections in urban centres and rural districts throughout the prairie provinces, the time has arrived when citizens might well devote some serious thought to the type of men (or women) who should represent them in the local councils during the coming year.

While at all times the question of the quality of representation on municipal councils is one of considerable importance, this year it is one of much magnitude, partly on account of the difficulties of local government occasioned by problems arising out of the depression and partly because of the restlessness of the changing times and changing viewpoints, particularly on social and economic problems.

From small but vociferous minorities one hears of suggestions and plans for changes which, if put into effect, might constitute a threat to the continued existence of democratic government in this country and there is always a danger, under a democratic form of government, of minority groups imposing their will on the majority, if the majority are apathetic about the conduct of their own affairs.

For this reason, if for no other, it is highly important that the citizens of this country take an active and intelligent interest in their own business—the business of government, whether it be in the local councils, the provincial legislature or the wider Federal arena.

It is unfortunately the case that sometimes municipal election times are decided by a comparatively small percentage of the electorate because so many refrain from going to the polls to express their desires through the ballot. If this results in the election of representatives unacceptable to the majority and the imposition of policies inimical to their interests those who refrain from casting their ballots on election day have no "comet" and deserve none.

To many it may seem that local affairs are of little importance. They appear trivial when matched with provincial issues or Federal policies and this misapprehension sometimes leads to an attitude of nonchalance on the part of a section of the electorate.

On the contrary, however, it should be remembered that despite the fact that local municipal units are the creation and, therefore, the creature of a superior government, nevertheless local self-government is the backbone of the people and of all government, and with the extension of affairs and authority imposed upon municipal councils in recent years is becoming increasingly so.

Not only that, but in many matters closely affecting the lives and welfare of the citizens of the country, the major governments have adopted the custom of making the advice and assistance of local municipal representatives in an increasingly large measure. They regard them, properly as the mouthpieces of the district they serve and more often than not defer to their wishes.

For this reason, as well as the necessity of having men capable of administering local affairs wisely, it is highly important that the municipal electors use care and sound judgment in selecting the men who are to represent them in the councils, that all the electors participate in the function of casting the ballot and that once having made their selection the electors support their representative as long as they prove worthy of the high trust imposed in them.

If the great majority of the electors take these duties seriously, less will be heard of trivial matters being injected into municipal election campaigns and municipal council debates and there is less likelihood that elected representatives will listen to transient demands of organized minorities or individuals who seek concessions or make proposals adverse to the interests of the great rank and file of the electorate.

One sometimes hears it stated that it is difficult or impossible to induce the best-dressed to accept nomination for public office. If that is so, it must largely be the fault of the percentage of the electorate who decline to take an active interest in their own affairs, both in the matter of selecting candidates and in giving their hearty support in devising and carrying out measures and policies for the benefit of the community as a whole.

Such comments are not, of course, applicable to all municipalities, and perhaps not even to a majority of them. In many cities, towns, villages and rural municipalities in the three prairie provinces, the electorate demonstrates a highly intelligent and active interest in its own affairs, and as a result their business is conducted wisely and well by capable men and men of integrity who justly command a respect and confidence which is not confined to the community they serve.

Spending week-ends in Belgium is a new vogue in France. English and Wales now have seven days for every 100 persons.

Dog Solves Crimes

Does Valuable Work in Connection With Duties of Mounted Police
"Dale," a big black and tan with a keen nose and a marked devotion to duty, is now a valued member of the Royal Canadian Mounted Police establishment at Calgary.

Dale is a dog who has done much remarkable work in solving a number of crimes in the Calgary district that he has won honorable mention in the Royal Canadian Mounted Police annual report. Just off the press. It takes a full page in the report to describe the dog's exploits. Here are a few of the cases in which Dale distinguished himself.

Ellen Simpson, two and a half years old, wandered away from her home. A search party failed to find her. Dale was called in and did.

Under difficult conditions Dale helped police in connection with the murder of Margaret T. S. Walker and Constable G. C. Harrison by Joe Punnett, Peter Wolton and John Kalmankoff, who were killed themselves in gun battles with the police.

Dale traced a demented man who caused an explosion in a farmer's house from a gasoline saturated suit of underwear found at the cellar door. The same farmer had lost two rolls of wire netting. Dale was taken to the place from which the netting was removed. He picked up the netting, found the wire and led to the arrest and conviction of the thief. But Dale is ornamental as well as useful. He took first prize in his class at the Calgary dog show.

Supplies Reach Coppermine

Hudson's Bay Boat Goes Through The Ice After Difficulties

Relieving anxiety which has lasted for months, supplies have finally reached Coppermine, principal base in the Central Arctic, according to reports reaching Edmonton. Blocked by ice, the schooner Aubrey B., under charter to the Hudson's Bay Company, carrying supplies to trading posts, has finally made its way through the ice of Coronation Gulf, reached Coppermine, and now is frozen in at that point.

Owners of the schooner, Jack Lickert, Bill Storr, Art Watson and "Slim" Purnell have sent word of their safe passage and a radio telegraph message to this effect has reached Edmonton.

The other Hudson's Bay supply ship made Coppermine safely on October 6. Aboard her was Ray Rose, company post manager of Inuit Island, and his bride, the former Miss Lillian Smith of Edmonton.

No Campaign Speeches

Alaskan Women Is Elected By Visiting Voters By Aeroplane

Alaska's first woman legislator, Flying Nell Scott, was elected without making a single campaign speech. The Alaskan woman's serial campaign against the male politicians and traditional of feminine talkative-ness. She let her masculine opponents have the first and last word while she took the votes. She covered the district in an aeroplane, having learnt to heart talkative-ness by her divisional voters and key persons in organizations. Her platform was based on popular Alaskan issues: Abolition of tax traps; enactment of social security legislation; financial aid to prospectors; substantial bounties on predatory animals, and more and better airplane landing fields.

U.S. Naval Strength

America's Naval Fighting Power Has Been Reduced

An official report disclosed that America's naval fighting power had been reduced since July 1 while other major nations were increasing theirs. The figures, made public by the navy department, showed the United States, chiefly by scrapping old warships in accordance with provisions of the arm-to-expire London treaty, had cut its fleet from 324 ships of 1,660,775 tons to 305 ships aggregating 1,062,875 tons.

Streamlined steam locomotives constructed for an eastern railway have been around their smokestacks to deflect the smoke upward to give the engineers the best visibility at all times.

The music of "America" also is the music of the national anthem of the British Empire, Denmark and Switzerland.

Sydney, Australia, will spend \$5,000,000 on the city railway.

Letter Of Thanks

Mayor of French City Votes Gratitude For Gift From Canadians

The plurgines of Canadian ex-servicemen and their dependents to Vinny Ridge during the summer was recalled by receipt of a letter of thanks from Mayor Milot, of Valenciennes to Lieut.-Col. J. S. Rankin, R.S.O., former commanding officer of the 45th (South Saskatchewan) battalion.

The letter, voiced the gratitude of the city for the valuable copy of the operation order covering the attack on Valenciennes on November 1, 1918, in which after the late Sergeant Hugh Clarks of the battalion, won the Victoria Cross.

The day prior to the unveiling of the Canadian Memorial on Vinny Ridge the city of Valenciennes dedicated a street to the memory of Hugh Clarks, and in the ceremony Mayor G. H. Gilbert, M.C., Yorkton, Sask., on behalf of the 45th battalion, presented to Mayor Milot the copy of the operation order.

In his letter the mayor said this document was treasured by the city of Valenciennes, and had been placed in the municipal library "in order that the city might know to whom they are indebted for their deliverance."

Substitute For Gasoline

Amateur Chemist Says World Will Benefit The Invention

An obscure Pittsburgh inventor and interior decorator, who likes to dabble in chemistry on the side, claims to have hit upon a secret formula from what he asserts he has developed a substitute for gasoline to revolutionize the gasoline industry.

He believes his discovery, which has not yet been put on the market, or been protected by patents, will revolutionize the gasoline industry.

The amateur chemist is Frederic J. Hoyer, and, as one example of the manner in which his "gas substitute" will benefit the world, says general use of his "gas" would greatly reduce, if not erase entirely, deaths from gasoline fumes poisoning.

In a recent demonstration of his discovery, Hoyer, accompanied by his attorney, A. P. Burkhardt, and a porter drove a car with standard equipment fourteen and one-half miles on a gallon of his "gasoline substitute," and one-half of a mile more on a gallon of his "gasoline substitute." At the completion of the last demonstration, Burkhardt declared: "Well, as far as we are concerned, this new fuel is perfect."

SELECTED RECIPES

FRUIT OATMEAL COOKIES

1 cup brown sugar
1 cup white sugar
1/2 cup butter
1 egg
1/2 cup currants
1 teaspoon soda
1 cup Purdy Flour
1 cup oatmeal

1 cup stoned dates, cut finely
Method: 1. Cream butter; add sugar. 2. Add well-sifted eggs, dates and currants. 3. Stir flour with soda and add to Mixture No. 2. 4. Lastly, add oatmeal, stir. Form into loaves, set in cool place, let stand overnight; then slice thinly and bake in slow oven of 300 degrees for 15 minutes.

Little mentioned among the drought hazards to cattle is the possibility of the animals eating the hearty Sudan grass, once or any kind of grain sorghum which, although abundant in growth by the dry weather, will stay green long after the normal feed grades have withered. The Department of Agriculture reports that in eating these plants live stock may consume a deadly dose of hydrocyanic or prussic acid, present in the plants.

Argentina has greatly increased in recent production this year.

A Precious Relic

Interesting History Of Coronation Chair At Westminster Abbey

While the work of preparing Westminster Abbey for the coronation next May is proceeding, one important relic at the Abbey will undergo no restoration, the Coronation Chair, according to a writer in the Manchester Guardian.

Except for dusting it requires nothing done to it, and it would not stand much. The famous stone of Scone and it had a history in Ireland before it was taken to Britain, and a wide crack which all but rent its solid mass sunder, and iron rings encase the chair. It is not only age which has caused the wear and tear. Though every monarch since Edward I. has been crowned on it, the use it has undergone on those occasions has been negligible.

For a long period of its history it was very properly looked after. Nearly everybody, it seems, was allowed to sit in it by permission of the attendants, or so did so on the spot. An inscription on it, "Peter Abbot slept in this chair, July 30, 1800," is illuminating. Peter Abbot went into the Abbey at night for a hot bath; he would carve his name on Purnell's monument. He did not succeed in doing that, but he did carve his name on the Coronation Chair. The surface of the chair is a mass of scratches made by visitors who wanted to leave their mark on it, and there must have been a time when every Westminster schoolboy deemed it a disgrace if he left school without carrying his name on the Abbey's most precious relic.

Amazing Fast Flight

Birds Fly From Florida To Alaska In A Month

Among the most amazing instances of the speed with which some species of birds accomplish their migratory flights is cited by Frederick C. Lincoln of the bureau of biological survey in his pamphlet, "The Migration of North American Birds," is that of the gray-checked thrush.

This bird, Lincoln says, "winters in Columbia, Ecuador, Peru, Venezuela and British Guiana and does not start its northward journey until many other species are well on their way. It does not appear in the United States until the last of April—April 25, near the northern limit of the Mississippi, and April 30 in northern Florida.

A month later, or by the last week in May, the bird is seen in northwestern Alaska, the 4,000-mile trip from Louisiana having been made at an average speed of just 130 miles a day.

Britain's percentage of police is 24 per thousand of population, while that of England is 5.05; and France, 3.18.

In Asia, the land of extremes, Mount Everest is 29,000 feet high, while the Dead Sea is about 1,293 feet below sea level.

Hawaii has 1,000,000 acres of forest, less than half of its government owned.

Switzerland's Ice Flower

Ice flowers grow through the ice. The ice flower of Switzerland, known as the "Eisblume," grows and forces itself right through the snow and settles, to blossom in the sunshine.

Now Ease Neuritis Pains Fast

For Amazing Quick Relief Get "ASPIRIN"

If you suffer from pains of neuritis what you want is quick relief. Aspirin is the only medicine that gives quick relief, for one reason, because they dissolve or disintegrate almost instantly for their quick moisture. (Note illustration of Aspirin tablet.)

Hence—when you take an "Aspirin" tablet, it gives quick relief. And this is really to start working almost instantly. Neuritis and neuritis pains start acting almost at once.

"Aspirin" tablets are made in Canada. The Bayer Company, of Germany, is the only manufacturer of the name Bayer in the form of a tablet.

Try it. You'll say it's marvelous.

KEY FIGURES IN EUROPEAN CRISIS

Premier Leon Blum of France and Anthony Eden of Great Britain in conference at Geneva upon the Spanish situation.

Moving Furniture

Moving Van Leaders Take Lessons

You wonder how all the furniture in a large house can be packed in a relatively small number of cubic feet in a moving van?

One of the reasons is the Indianapolis College for Moving Van Leaders, operated by a large furniture moving company. Students in the course undergo two strenuous weeks of loading and unloading, with classroom work in which driving regulations and transport laws of every state in the Union, as well as Canada, are studied thoroughly.

The "theory" week of today has been causing watchmakers some trouble. The accuracy of a watch is governed by the size of the balance wheel, and while, in the rectangular type of watch, the wheel can be of fair size, there isn't much room in the round type.

And so the works are now being arranged differently. Instead of being round, the balance wheels and movements are in two separate layers. The balance wheel has been made much larger since than before to be used, so that the United States watch can now be made very much more accurate.

Rare Albino Bullfrog

Only Known Frog To Sport Blend Of Three Colors

Lith, rare albino bullfrog of the L. Lewis son, is gradually turning white. The albino is pushing the fact of fame in Sweet Home, Oregon, when it beat off the attempt of a cougar to attack Mrs. Bert Simons. The attack occurred on the Simons ranch when Mrs. Simons went out to see why her sheep had not come in.

She found three dead sheep slain by the cougar, and then soon realized that the cougar, hiding near by, was snoring after her. The small dog charged in, worrying the cat until Mrs. Simons was able to make her way to safety. Hunters were soon summoned and trapped the cougar into the timber where it was killed.

The photographic advertising art is one of the largest industries in the world.

So officials can't explain Lith's yellow streaks. She seems healthy, they say.

Odd Animal Buddies

On a farm at Tyndale, Australia, a kangaroo has developed a remarkable affection for a Jersey cow. The kangaroo accompanies the cow to the pasture, feeds with her, lies down with her at night, and goes to the milking yard and "stands by" while the cow is being milked. If the cow is threatened by a hostile dog, the kangaroo will leap to her rescue and drive off the aggressor.

Not A Good Citizen

Some years ago the Canadian government made a ruling that no settler who wished to live on a small island should be allowed a bona fide claim. The reason given was that no man who wished to live alone, in the last analysis, is a good citizen.

It is estimated that it takes 2,000 years to build seven inches of soil.

Perfumes were used in Egypt as early as 3500 B.C.

The Japanese game of Go, which resembles chess, is 4,000 years old.

"Calico Cat" Quilt Delight To Piece

"Fritzy Patsy" may be just a Calico Cat, but he certainly makes a bright and amusing quilt motif. Make him a "calico cat" indeed, by using your scraps. It will lend variety to the work and a glimpse to your finished quilt. Darts from outlines the features. Calico cats as well as all breeds of cats are illustrated for cutting and finishing. Together with yardage chart, diagram of quilt to help arrange the blocks for a single and double bed size, and a diagram of quilt which serves as a guide for placing the patches and suggests contrasting materials.

To obtain the pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winslow Newspaper, 178 McMillan Ave., Minneapolis.

There is no Alice Brooks pattern book published.

Atter Of Roses

Perfume Manufacturer From Bulgaria Gives Some Side Lights

Carrying in his vest pocket the scent of an acre of roses, Peter Shipchov, Bulgarian manufacturer of attar of roses, arrived in Montreal.

"It takes between 3,500 and 4,000 pounds of rose leaves to make one pound of attar," he told a reporter in the Mount Royal Hotel, and then pulled a little bottle holding an ounce of the oily liquid out of his vest.

Instantly a new garden seemed to come to full bloom in the lobby of the hotel. The reporter put it in an inch of his nose and nearly choked. Concentrated odor was un-pleasant to the nose.

"Bulgaria is the largest producer of attar of roses," Mr. Shipchov continued. "We have 70,000 hectares of rose gardens in central Bulgaria. The roses are all the 20-to-22-inch, crimson Damask rose, which we find in the most profusely scented."

"This year's production," he said, "is small. It is not more than 3,000 tons. Bulgaria is not a large country. The roses are all in the hills. They are between 20 and 25 inches. In preparation days the price was \$25 an ounce."

To Aid Recruiting

Larger Best Periods For Soldiers Is Suggestion Made

More story for soldiers would tempt recruits, according to one expert in a contest organized by the British Northern in an attempt to increase the comfort and attractiveness of the soldier's life. Soldiers should be allowed to stay in bed until seven o'clock on week days and nine on Sundays, not at eight.

The expert said. The report of the contest, just issued in London, said the comfort of uniforms and the admission of girl friends into barracks rooms. Recruiting is becoming difficult in Britain.

Some people waste a lot of time telling you what they like to some body else.

Africa has snowfalls within seven miles of the equator.

Population Of Prairie Provinces Is Shown To Be Drifting Northward

Easy-Going Teaching

Severe Criticism Is Levelled At Present Educational System

One of the most severe criticisms which continue to be levelled at the educational system of this province, says the Toronto Globe, is the inadequate or ineffective instruction which is given in the correct and effective use of the English language.

Following remarks of Mr. J. G. Harvie, chairman of the Ontario Board of Education, to teachers on the importance of training children in grammatical form, correct pronunciation and clear enunciation, the "Puck" and "Times" says: "Unfortunately there is a disposition toward easy-going carelessness in these matters which is earning Canadians an undesirable reputation."

This sentiment is echoed by the Ontario Journal, which remarks: "Apparently we have not been overly successful in teaching this subject, and the schools continue to turn out young people whose sentences are stilted, who are verbose where they should be concise, take too long to make a given point, have no conception of proper punctuation."

Of all the subjects at present on the curricula of both public and high schools there is none more important than those which may be included under the general term English. No other subject is so useful and so necessary to all men everywhere in life as the ability to write and speak clearly.

Without a sufficiently recognized standard, carelessness is liable to result. It is also the fact that the modern radio, moving pictures, and a great deal of magazine literature are very powerful factors for the teaching of mis-spelling, mispronunciation, slang phrases and other undesirable tendencies which the teachers have to combat. It is not only a question of teaching correct English, but it is also a case of having the pupil "understand" much that he picks up from sources outside of the classroom.

A child adopts the tongue of his parents and forms habits of speech at a very early age. It is necessary, therefore, that sound groundwork be established in the first school years so that later teaching, which is equally important, may be built on a substantial base.

Canada's Wheat Trade

Wheat Exports Greatly Increased During First Half Of Current Fiscal Year

Increased sales of Canada's wheat trade during the first half of the current fiscal year is indicated in figures released by H. J. L. Haley, minister of national revenue.

From April to September, both months inclusive, Canada's wheat exports totalled at \$100,700,000, compared with \$59,000,000 for the same period of 1933. This was an increase of 86 per cent.

This year 137,443,064 bushels were exported, yielding an average of 86 cents a bushel; a year ago the 71,640,937 bushels which went abroad averaged 83½ cents.

The trade figures for the current half year disclose that out of 14 groups of export commodities, only one recorded a decline. Increases in meat, cheese, plank and boards, newspaper and partially manufactured copper were substantial.

Ringing For A Century

Electric Bell At Oxford University Museum, Is A Phenomenon

An electric bell which has been ringing for almost a century, was one of the exhibits at the Oxford University museum staff's annual exhibition, says the London Telegraph.

The bell, which was made in 1840. It is not known by whom was made at Oxford after it had been ringing for 30 years. It has not been moved since. Located in glass, it consists of two cylinders made of copper and 5,000 paper disks coated with sulphur.

The battery charges itself, and is the nearest thing to perpetual motion which has ever been achieved. Nobody can tell how long it will continue to ring.

Wife—"You don't give me nice presents now."

Husband—"No, but I pay for the goods you give yourself."

The sweetest smelling orange blossoms come from the sour orange trees.

Population of the prairie provinces is moving northward.

Figures for the 1930 five-year census of the three provinces published by the trade and commerce department show the increase in the six most northerly electoral districts amounts to almost 17 per cent. This compares with an increase of 2½ per cent. for all districts.

The total population of Manitoba, Saskatchewan and Alberta is 2,414,000 against 2,353,539 in the 1931 census. In the six northerly electoral districts the population has increased from 237,065 to 282,928.

The northward movement is attributed by the department mainly to three factors:

1. Taking up of farmlands in the lower districts by farmers who have given up their old farms in the drought stricken areas of the more southern sections of the provinces; 2. The development of mining fields in the north, business developed by the Hudson Bay railroad and the new northern coast terminal at Port Churchill.

In northern Manitoba the district census districts of 1931 are 1930, an increase of 1,613 over the 1931. In the southern section of this district there are 1930, an increase of 1,613 over the 1931.

In Saskatchewan the district of 1930, an increase of 1,613 over the 1931. In the southern section of this district there are 1930, an increase of 1,613 over the 1931.

TOWN OF REDCLIFF

The Local Tax Arrears Consolidation Act

The Council of the Town of Redcliff has passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing. All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December except as hereinafter mentioned.

The following persons may make application to the Council to come under the provisions of the above Act.

Any person, firm or corporation who is the owner of any parcel of land in the Town of Redcliff, against the title of which, there is a subsisting notification for arrears under "The Tax Recovery Act 1929."

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application, in the case of lands which have been finally acquired by the town of Redcliff but not sold, or such persons personal representative.

In such cases where the applicant's property is to be exposed for sale at the forthcoming Tax Sale on August 22nd, 1936, such applicants should make their applications in time for the Council to consider same previous to that date.

Upon receipt of the applica-

tion, the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes, if the same were consolidated, and the applicant shall deposit with the Secretary Treasurer one fifth of such sum. In such cases where the application to consolidate is made after the 15th day of November 1936, the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current year's taxes.

In any event the current year's taxes shall be paid by the applicant on or before the 15th day of December.

When the application is granted, the deposit shall be applied on the applicant's consolidated arrears, otherwise it shall be repaid to him.

Hard to Fit?

HAVE you experienced difficulty in securing a dress to fit you properly? Do you find the dress you order a little tight in the hips, a bit narrow across the shoulders or short in the sleeves? Do you find it hard to decide what type of foundation garment you require?

If these are your problems, then your figure probably is a little different from the average type. You are the type who should measure yourself very carefully or, better still, you should have somebody else do it for you. Never be satisfied to order the same size you had last time. Measure and make sure of the size you wear every time you order.

Why not write to EATON'S Stylist Service, enclosing your measurements, and I will be glad to advise you regarding your requirements. However, you must remember that I am not a shopper and act solely in an advisory capacity.

Janice

EATON'S

aid to him.

In case the application is not granted, provision is made in said Act for an appeal to the Minister of Municipal Affairs.

The Council may, on the applications in writing of any person liable under a consolidated agreement under this Act and with the approval of the Minister, by resolution, extend that agreement for one year and waive payment of the installment payable under the agreement for any one year of the years for which such agreement is made, in case it is thought proper so to do by reason of crop failure or other circumstances.

No buildings, fences, fixtures or other improvements shall be removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come under the provisions of the above Act, all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such consolidation agreement is in force.

YOU Share In Canada's Greatest Co-Operative Business

LIFE INSURANCE is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last year Life Insurance Companies in Canada distributed, to Canadian policyholders and beneficiaries, over Half a Million Dollars.

Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

CONTESTANTS IN THE MILLER-WILL "STORK DERBY"

Development Of Television

Miss Laura Devine, of Australia, Dances For First Television Program

The television broadcasting experiments carried out by the British Broadcasting Corporation were described at Melbourne, Australia, by Miss Laura Devine, a dancer, who claims to have done more television work than anyone else in the world. She danced in the first television program broadcast by the B.B.C. in 1932 and appeared regularly twice a week for nearly two years until the programs were discontinued.

Miss Devine's acrobatic dancing was particularly suited to television, as all the movements were "wide" and decisive. Ballroom dancing had too much detail to broadcast well, she said, and tap-dancing, although good for sound purposes, was blurred pictorially.

The first make-up used was absolutely makeless, black eyes and lips being imposed on the face by the blue streaks drawn down both sides of the nose. This was later modified, and blue was used for emphasis instead of black. Television dresses had to be carefully constructed, black and white being contrasted heavily, there was no room for shades of any color. The dances had to be specially arranged and were executed on a black and white check floor to prevent blurring. The television beam was so limited that Miss Devine could not stretch out both legs and kick high without moving outside the picture.

At present, Miss Devine said, the B.B.C. was experimenting in a new process to provide a more solid picture, as well as having a wider beam. For close-up television pictures were better than broadcast. Although television reception sets were most expensive, a number of wireless fans had made their own. It was difficult to know how widely the programs had been received, but she had received letters from Italy, Sweden and Scotland.

Miss Devine, an Australian by birth, started her dancing career with the circus when she was five years. She was trained by her father, Tom Rees, a circus man who died recently.

Physical Training

British Educationalists Say More Stress On Subject Is Needed

The beautiful walk and poise of the modern girl is due to greater provision for physical training, say William Forrest, chairman of Blackburn Education, told the British Institute of Adult Education at Oxford. He suggested that more physical training colleges were needed for men.

E. Major, principal of the Carnegie Physical Training College, Leeds, said the majority of children now left school with a knowledge of and desire to take part in physical activities, but the facilities and opportunities for further physical education were totally lacking.

"As a nation," he added, "we are not maintaining the standard of physical development which racially we naturally belong to."

U.S. Court Trials

American Newspaper Man Favors The English System

Stuart H. Perry, publisher of the Adrian, Mich., Telegram, told fellow members of the Inland Daily Press Association they should reform themselves against what he termed the covering of court trials "as if they were sporting events."

He attacked various cases of what he termed "bigamous" marriages reported. While he praised the English system of contempt proceedings against this style of reporting, he was effective here because "the American courts are virtually helpless to enforce the powers they possess."

"Civil judges and prosecutors are appointed and police chief and other law enforcement officials are recruited from the spoils of politics, there is little hope for a change," he said.

Louis XIV. of France was entertained by his subjects at a time when fashion decreed that men should wear long curls; so he had the first wig made for him, and his ladies thereafter adopted the fashion of wearing wigs so that the king might not be self-conscious.

A gangster among trees is the strangling-fig, says Dr. John K. Rinal, New York biologist. His little tree destroys its plant victims by enveloping them, and sometimes eats the climax by destroying it.

Germany shipped nearly 670 tons of artificial flowers to other countries in the first six months of this year.

ROYAL LOVERS ATTEND ARMY MANOEUVRES

Queen Wilhelmina of Holland (extreme right), accompanied by Princess Juliana and Prince Bernhard, inspecting a camouflaged light field-piece during army manoeuvres in the southern part of the Netherlands. The engagement of the Princess and young German Prince was announced recently.

Hawaiian Civilization

Knack For Colored Speech Is Characteristic Of These People

For a picture of the spirit of the Hawaiians and their civilization, Henry P. Judd has made an extensive collection of old Hawaiian proverbs. Judd is professor of Hawaiian at the University of Hawaii and a former president of the Hawaiian Historical Society.

"The Hawaiian, in his keen power of observation, his sense of humor, his ability to mirror social life, to estimate achievements correctly and to express his idea of religion and morals in a concise form, displayed a remarkable talent which surely must give him a high rank among the peoples of the world, and characterize the Hawaiian people as generous-hearted, amiable, practical and kind of nature."

Many modern proverb have their counterparts. "While the rain is still far off, watch your shoes," was their earlier saying of the modern "Make hay while the sun shines."

A fair for colorful description is indicated in:

A bald-headed man is like the rilling moon; a double-chinned person is like a wrinkled-up eye; a gray-haired person is like white sugar-dust.

The Hawaiians are adept at apt and subtle and in condemning prominent people and social parasites. "A water gourd gurgles when not full," he said. And: "Eels in shallow water show their color."

The Hawaiians always have been sentimental. "Love is like fog; there is no mountain on which it does not rest." They said this sentiment the highest compliment when they said: "Love equals a calabash of fish and poi."

Knack for colorful speech is indicated by expressions "entangled by the whisks" (for caught unaware); "old age" the red sky of evening."

Aerial Photographs

Measuring Of Land By Aerial Method In Arkansas

Measuring of land and checking of procedures in accordance with agricultural conservation program through the use of aerial photographs is now being carried out in Arkansas, reports C. C. Randall, acting assistant extension director.

As index map is used to determine the location of the individual pictures, and each frame is checked against the picture. Each field is identified and the acreage determined. One square inch of surface on the photograph equals ten acres.

"When I looked out of the window, Johnny, I was glad to see you playing marbles with Billy Simpkins."

"We wasn't playing marbles 'we'd had a fight, and I was helping him pick up his teeth."

Hunters Must Beware

American Game Wardens Warn People By Trapping Method

Ten thousand cleverly worded posters urging hunters to be careful not to shoot each other during the hunting season have been posted by wardens throughout Maine's vast timberlands.

There were 21 fatalities and 20 serious wounds during the 1935 season.

The posters, conceived and distributed by the Department of Inland Fisheries and Game, read: Bag Limit—Dear, One; Men, Nene. Don't Pull Your Gun by the Muzzle From a Boat, From an Auto or Through a Fence.

Be Sure It Is A Deer Before You Shoot. Don't Shoot at a Moving Bush, It May Be a Man.

Don't Spoil Your Hunting Trip by Careless Shooting. Careless Shooting May Cause A Life of Regret.

Better Come Home Without A Deer Than Bring a Man on a Stretcher.

Help Make the Woods Safe For Hunters. Remember—Perpetual Closed Season on Men.

Careful Hunting Is Sport—Careless Hunting Is Crime.

Irish Speakers

Trying To Revive The Oratory Of Past Generations

Professor Thomas O'Donoghue of Presentation College is trying to revive the once great talking powers of the Irish race and his first idea is a separate "talking room" in every public library where a man can talk away to his heart's content without fear of being interrupted by his wife.

"The only place where Irishmen can talk now is in saloons and drinking places," he said, "but the high cost of drink in this country talking is becoming a very expensive occupation, and more's the pity."

Compared with twenty years ago there is not a notable orator in the Free State.

President Bannan de Valera gave the political reporter's cramp with his long, rambling sentences. William Congreve, leader of the opposition, is just the opposite. He speaks in a short jerky style, easy to follow but not what could be called silver-tongued eloquence.

The latest German passenger-carrying air liner, which is driven by Diesel engines at low cost, is said to be convertible for war purposes.

More and more the attention of the medical profession, and of intelligence people generally, is being focused on health examination before marriage.

INAGURATION OF MOBILE POST OFFICE IN ENGLAND

A fully equipped Post Office on wheels, with stamp wickets, letter slots, telephone and telegraph facilities, has been put into operation in England. It will be used largely at Agricultural Shows and small villages where local postmen are temporarily over-tasked.

The Machine Age

If Man Does Not Master The Machine, The Result Is Social Disaster

Either man will master the machine, or the machine will master man. Such, in effect, was the conclusion of M. Edward Herivel in addressing the International Institute of Intellectual Co-operation at Geneva.

The development of a machine that civilization may prove to be good or bad, precisely as we adapt our economic system to the new conditions. We cannot stop that development. It is therefore for us to see to it that there is adequate distribution and increasing consumption.

The more the problem of the machine is considered, the more fundamental it will be seen to be. If it is not solved, it is capable of smashing civilization. For if machines take the place of men (as they are doing, for even in the countries which are now recovering economically unemployment persists), there must be revolt, in which we are sure to be involved.

The machine age, in which we are living, is far more serious than appears to be anticipated. Yet the alternative to social disaster does not appear difficult. It is nothing less than the gradual emancipation of mankind from arduous and disagreeable manual tasks, and the immense improvement of society. It is necessary that political leaders, manufacturers, business men and economists should think of a system which will distribute goods as fast as they are turned out. On the one hand, there can be no permanent restriction of production, but on the other hand the inevitable growth of production, in the world as it is, is being checked, means destruction of purchasing power and spread of misery.

It may be that this is the root of the trouble on the right answer to which will depend the happiness or unhappiness of civilized countries in the near future. The machine is the modern Sphinx. If we cannot read the Sphinx, then we must pay the penalty. If we can read the riddle, then we shall win a new freedom—Christian Science Monitor.

Another Ocean To Conquer

Australian Airmen Analytically Discussing Feasibility Of New Flight

The possibility that an Australian airmen will be the first to cross the Indian Ocean as yet unexplored space, is not being eagerly awaited in aviation circles at Sydney, New South Wales.

The proposal that this pioneer flight should be organized in order to open up a regular service by this route to South Africa, is strongly supported by Harold Gatty, the famous round-the-world flier.

"Crossing the Indian Ocean is the most valuable flight that man has ever done," he said. "Its great importance is that it would provide an alternative service route from England to Australia."

In case of trouble in the Mediterranean or Asia Minor, the England-Australia airplane could be flown through Asia, Africa and the Indian Ocean lands.

"It appears to me that a perfectly practicable route could be flown from England to West Africa, across to Mombasa and thence to Australia."

Capt. P. G. Taylor, a well-known Australian aviator, has signified his readiness to undertake the flight. But he will only do it provided he has authority to select the aircraft, the route, the crew and the equipment.

Catches Large Fish

North American Tuna Meets Record At Sea

Dr. John R. Britzley, of Del Rio, Texas, missed setting a new North American tuna record by two pounds. It was revealed at Liverpool, N.H., recently, by the Liverpool Tuna Club.

Britzley recently landed a 707-pounder in one hour and 50 minutes. His catch was one pound less than the 730-pound record set in 1924 on this point by Kane Grey. Grey's fish was a world record until 1924, when an 821-pound fish was caught off Whitley, England, by L. Mitchell Henry.

Dr. Britzley made his catch, the largest in ten years, under Liverpool Tuna Club regulations, using a 30-horsepower and 32-ounce net. The fish was 9 feet 6 inches in length and had a girth of 6 feet 6 inches. It is the fourth fish weighing more than 600 pounds that Dr. Britzley has landed this season.

Pipe tacks, needles of South America, are so thin that one can see through them.

Ontario Farmers' Problem

Grain Weevil Causes Heating In Many Granaries

The presence of weevils in granaries is believed to be responsible for the large amount of new grain that is heating this fall of 1935. Numerous farmers have communicated with F. B. Thomas, Agricultural Representative, recently, reporting that their stored grain was heating badly, particularly wheat. Some cases of oats and barley heating have also been reported.

Undoubtedly the grain weevil is responsible for much of the trouble, Mr. Thomas stated. It is probably the result of several years of grain storage. In ordinary years, when grain prices were favorable, the average farmer sold the bulk of his grain after threshing but in the last four or five years, with prices poor, there have been very heavy carry-overs of grain for feeding. The result is that the weevils have had many opportunities to breed.

It is not doubtful that the weevil has been very successful in its breeding, but it does not doubt have been infested with the destructive insects and new grain, placed in the granaries this fall, has also been attacked.

In cases of severe infestation fumigation may be necessary. To be successful, fumigation must be started out when the temperature of the grain is over 70 degrees Fahrenheit. Carbon tetrachloride is the most effective fumigant, but care should be exercised in its use as it vaporizes into a foul-smelling, highly inflammable, poisonous gas which is deadly to the air. The quantity to use depends on the gas-tightness of the granary.

Under satisfactory fumigating conditions, the quantity recommended is one pound of liquid to every 50 bushels of grain. A very useful spray that may be used for destroying the insects in grain storage places is cheaply made by dissolving 100 pounds of kerosene in a full ton of water. This is prepared by adding one-half pound of pyrethrum to one gallon of kerosene, stirring the mixture to stand and agitating it at intervals over a period of two hours or longer. The residue settles at the bottom.

A peculiar thing about grain insects is that they become inactive at temperatures below 50 degrees Fahrenheit. In most parts of Canada the winter temperature is sufficiently low to prevent weevil development. However, in damp or heavily infested, however, may maintain temperatures favorable to insect life. In some cases, low outside temperature conditions.

Digging In History

Study Table Manners And Eating Utensils From Earliest Days

Digging into the history of eating, says George S. Davis, the assertion that civilization's first fork users were called staves.

"Futiles," named the National Geographic Society, "were the first to use forks for eating, and were ridiculed as ultra-tasteful or even decadent."

The table manners research was launched after a joint expedition of the Geological and Natural History Institution scientists uncovered some 1,000-year-old spoons in Alaska.

"These ancient utensils," the scientists reported, "give a vivid picture of the life 10 centuries ago, but they are also reminders that although table manners have changed, eating implements of to-day are essentially the same as in pre-historic times."

They hastened to add that the Eskimo still clings to the age-old use of his knife. This consists of stuffing his mouth with meat and then swifiting off the remainder with a quick stroke that rarely misses his nose.

Getting An Education

Foreign-Born Farm Worker Who Was Willing To Overcome Obstacles

When one sees how easy it is for some people to get an education, the reverse must draw attention. There is a foreign-born farm worker, who is employed eight miles from London, Ont., who never missed an evening class at the technical school in that city last winter. Every night he walked the eight miles to the city and eight miles back so that he can improve his English. This year it is expected a complete and successful trip each night. That man who walked sixteen miles each night to be able to learn English has the makings of a good Canadian citizen. Surely such a man will get benefit from a course which costs him so much labor—Blaque Point Review.

Beavers use their tails to slap out ripples on the water surface and to steer themselves while swimming.

Water striders are heavier than many other bugs, but can run about on the surface of water with ease.

Tokyo has more than 5,000,000 inhabitants.

Interesting Local Items

Mrs. A. Tiekens, of Rosedale, is at present visiting here with her parents, Mr and Mrs John Kitchen.

The next session of the Dominion parliament will be called early in January. Pemien King will attend the King's coronation next May.

Direct relief recipients in the province reached a total of 51,97 during the month of October. This is an increase of 1,734 over September.

Mr T. W. Bassett, assistant general manager of the Dominion Glass Co. arrived from the head office in Montreal last week-end and is spending this week here inspecting the local plant.

October 21st, 1936, was the Diamond Jubilee of the first shipment of wheat from Manitoba. On that date, in 1870, Manitoba shipped 857 bushels to Toronto for \$835.12. The wheat was resold for seed purposes in Ontario at \$2.50 a bushel.

Owing to the severe weather last Thursday evening the attendance at the first of the series of whist parties to be held under the auspices of the local I.O.O.F. was not as large as it no doubt would have been. As those who were unable to attend last Thursday may still enter the contest by taking the low score last Thursday and take their chances of winning both the weekly and final prizes. The contest will continue for six more weeks. Mrs. Wheeler won the first prize last week and Mrs. Mallard consolation.

Early settlers in this part of Alberta will remember that when homesteads were opened up there had been complaint to the effect that certain districts were not suitable for farming but only for ranching. The recent compiling of the population shown as a result of the last census of the province would indicate that those who lodged the complaints were right and the governments of the day would have been well advised if they had heeded those warnings.

This year's census shows that between 1931 and 1936 the population in southern districts had increased only 2.5 per cent, while in the more suitable farming districts the population increased 17 per cent. There is no doubt that the increase in the north was caused by the moving of a large percentage of farmers from the south.

Printing Offices Now Have to Pay License

Rate Set According to The Business Done
Job department in printing offices are now under what is called the "Printers Code" this system was put into force by the present government to future job printing offices must use printing prices exclusively on the provisions and regulations set forth in the code. Job printers also have to pay a license to do business and the license fee is regulated by the amount of business done and goes up to as high as \$50.00 per annum.

This new system appears to mean that only legitimate printing offices which are licensed can do any kind of printing in the shape of bills, notices or price lists, or any other line of printing shops.

The Review has not yet received the code price list but we are informed that it is only in a few cases that the usual prices have been altered.

It is hoped the government will see to it that scab printers from outside the province will be attended to.

Gordon Memorial L.A. will hold a sale of home cooking and fancy work in the school room of the church on Wednesday Nov. 25th. Afternoon tea will be served. An invitation is extended to all.

LEGION MEETING

The monthly general meeting of the local Legion will be held in the club rooms at three o'clock on Sunday afternoon, Nov. 15th. As a number of interesting matters will be up for discussion a full attendance is requested.
